### Løn under praktikken

Praktikken for uddannelserne på erhvervsakademiet (undtagen laborant) er pr. definition ulønnet. Det betyder, at studerende ikke må modtage løn i praktikken, heller ikke hvis de frasiger sig SU.

#### Praktik i udlandet

Der gælder som udgangspunkt de samme regler for praktik i udlandet, som for praktik i Danmark.

Der er dog en undtagelse fra ovenstående, nemlig i lande, hvor det er et lovkrav, at studerende skal modtage løn i praktikken.

Hvis det er tilfældet, skal du:

1. Dokumentere, at det er et lovkrav i pågældende land
2. Frasige sig deres SU i perioden (så de får trukket denne periode fra deres 'individuel normerede støttetid')

### Udgifter relateret til praktikken

Studerende, der er berettiget til SU, kan få dokumenterede udgifter dækket i forbindelse med et ulønnet praktikforløb. Udgifterne skal være relaterede til praktikopholdet.

Refusion for sådanne udgifter er uafhængig af, om den studerende framelder sig SU eller om den studerende modtager en erkendtlighed. Afgørende er alene, om den studerende er berettiget til at modtage SU. Indtægten er ikke skattepligtig. Læs mere [her](#)

### Salary during your internship

Within the framework of Business Academies in Denmark, the internship per definition is unpaid, which means that students may not receive a salary during their internship, not even if they opt out of SU during the internship period. (This does not apply to students on the Chemical and Biotechnical Science programme as their internship is paid).

#### Salary and internship abroad

It is possible though to be exempted from this rule if the country where the internship takes place, has a legal requirement that salaries must be paid to students doing their internship. This is possible for our students if:

1. It must be documented that it is a legal requirement in the country concerned
2. The students opt out of SU during their internship period (and this period is then removed from the individual standard time limit for support)

The student must contact our SU Office for the above.

### Expenses during the internship

The company also has the possibility to contribute to the intern's documented costs related to the internship, such as telephone, transport, travel insurance, flights, etc. These contributions do not affect the student's SU.
