

Wiseflow Device Monitor on Mac

After Wiseflow Device Monitor is installed on your Mac, and testing shows that it works: **Wiseflow Device Monitor** is ready, check the following to ensure proper functioning of Wiseflow Device Monitor.

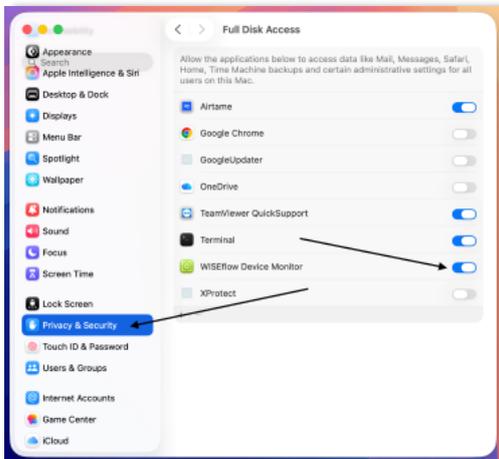

- If there is a **check mark** in **Open using Rosetta** on **Macs** with **M processors**, Macs from 2020 onwards, **click** on the **program icon**, under **Get Info**, there should be a **check mark** in **Open using Rosetta**.

Wiseflow Device Monitor on Mac

- Is **Full Disk Access** enabled in **System Settings** under **Privacy & Security**, otherwise enable it.

- Is **Screen & System Audio Recording** enabled under **Privacy & Security** (it may be that the program need to be added, via the **+ button**)
